LISTO Roadmap

LISTO TURNS 2

During 2019, the LISTO project was very active in two work packages. In WP 2, partners hosted AIMday match-making events and we organized a workshop to evaluate the activity. In WP 3, our teachers tested the International Virtual Classroom we developed together and we started the preparation of a second edition in 2020. In addition, we started WP 4 to discuss the concept of “Entrepreneurial University” and how to promote innovation and entrepreneurship.

PREPARATION OF PUBLICATIONS / IVC 2020

PREPARATION OF PUBLICATIONS

The LISTO project is moving from action to delivery. Our consortium is preparing two publications. The first one will present a quantitative and qualitative analysis of the WP 2 activities: *University-Industry cooperation in Latin America: Lessons learned from applying the AIMday methodology*. The second one will share our experience of developing and testing an International Virtual Classroom. The title of the book with a lot of practical advice: *Entrepreneurial Virtual Classroom Handbook: an interdisciplinary approach from a European and Latin American collaboration*. Both publications are forthcoming in 2020 and will be available in English, Spanish and Portuguese.

IVC 2020

We are proud to launch the call for application for the second edition of the LISTO International Virtual Classroom: "Entrepreneurial Solutions in Innovative Global Networks". The course aims at developing and strengthening students' innovation and entrepreneurial skills within the framework of an international, multicultural and multidisciplinary virtual teaching and learning environment, with a focus on global entrepreneurial ventures and the United Nation's Sustainable Development Goals. It will run between March and May 2020 and students from all 10 LISTO partner universities can apply.
